BEYOND ATTENDANCE PORTAL

Fingerprints are the way forward however it is not always possible to have a device on hand to scan in with. So we've decided to use what's in your pocket for such occasions. Beyond Attendance Portal turns any smartphone into a personal biometric device with the help of a USB scanner.

Beyond Attendance Portal provides a standalone solution that is easy to use, effective and cheap. It allows for multiple users to all connect to a single centralized point, making control and administration a breeze. Beyond Attendance Portal means you can scan in the most remote of areas, perfect for temporary sites or for small teams of employees.

Setup work times and groups for all your employees, get them to start scanning and Beyond Attendance does the rest, calculating who left early, came late, never worked their weekly hours or who worked overtime.

- Keep track of employee's while you're out on the road via any mobile Android device
- Allow employee's to check-in remotely via their smartphones and tablets.
- Remote check-in integrates with mobile GPS systems to ensure employee's are at the location they say they're at
- "No Brainer" clock ins and outs. Simply scan a fingerprint on the device and Beyond Attendance works out the rest
- Mobile Check in report overlays scan information on a map for user convenience
